Small Drawstring Storage Bags for Soldiers (Ditty Bags)

1 1	Use substantial-weight 60", 54", or 45" fabric-preferably a
±•	dark solid. Bright color and print ok for hospitals.
2	Use substantial-weight thread; need not match fabric.
	Use a 36" section of cord for drawstring for each bag. Use
5.	a 1/8 braided nylon or twisted cotton string. Use a large
	safety pin to feed cord through casing.
2	Lay 60" or 54" fabric out on table; leave it folded for
5.	cutting-as it is on bolt. Extra fold is required for 45"
	fabric, see step 4c.
4.	a. If using 60" fabric, measure carefully and cut into 12"
1.	segments; then cut each of those on the fold so that each
	rectangle is about 30" X 12". (If the cut is not fairly
	precise, it will be difficult to match sides and sew.)
	precise, it will be difficult to match stats and sew.,
	b. If using 54" fabric , cut into 12" segments ; again, it is
	important to measure and cut carefully to ease matching and
	sewing of sides; then cut each of those on the fold so that
	each rectangle is about 27" X 12".
	c. Using 45-inch fabric requires an extra step; the width
	should be folded into thirds-about 15" wide; cut into 24"
	segments; then cut on each of the two new fold lines. Each
	rectangle will be 24" X 15".
5.	rectangle will be 24" X 15".
5.	rectangle will be 24" X 15".
5.	rectangle will be 24" X 15".
5.	<pre>rectangle will be 24" X 15". a. Fold the 30" X 12" rectangle so that it is 15" X 12".</pre>
